In order to optimize the installation of PlanningPME Web Access, we invite you to read the pre requisites below.

It is mandatory to read each point carefully and to confirm the points that concern your type of installation. After validation, send back this document by fax with the order form.

Your order form will be proceeded only if we this document is joined.

For more details, our IT department is at your disposal at this number: +33 (0)1 69 47 10 00 or by email : support@planningpme.com.

I. INSTALLATION PRE REQUISITE

Pre-Requisite	Signature
The set up is only running on Windows Server 2003 and 2008.	
If you already use PlanningPME with a MS Access database, it is mandatory that you migrate to a database other than MS Access. You have the choice between the following databases: Sql Server, My Sql or Oracle. In that case, please contact us to have all the information required to proceed to the migration.	
IIS (Services Internet) MUST be installed on the server that hosts the site. This is a Windows component. To install it, you must launch the Control Panel – Add or remove programs – Click on Add / remove Windows Components (on the left side) then select Internet Information Services in the list and launch the installation.	
The program requires the installation of Framework 4.0. The program also installs it but in that case, the server will automatically be restarted. To avoid to shut down your server, we advise you to install this component before installing the program.	
The program requires the installation of ASP.NET AJAX 1.0 component. You can download it from this link : http://www.microsoft.com/download/en/details.aspx?id=883	

II. IF YOU DO NOT HAVE A DATABASE ADMINISTRATOR

Pre-Requisite	Signature
The set up is going to install SQL Server 2005 Express with a database PlanningPme, a user PlanningPme. You will then need to restart your server several times during the installation. This solution is not recommended if you want to use the Client-Server	

software PlanningPME.	
------------------------------	--

III. IF YOU USE SQL SERVER OR MY SQL

Pre-Requisite	Signature
<p>If you use SQL Server or My Sql, the set up is to create a database Planning or if a database is created, it must be named Planning.</p> <p>The authentication of your server must allow either a Windows authentication or a SQL Server authentication with a user and a password (authentication used for PlanningPME Web Access).</p> <p>To control this parameter, launch the panel Enterprise Manager, right click on the server SQL and on the tab [Security]. You can then select SQL and Window authentication.</p>	

IV. IF YOU USE ORACLE

Pre-Requisite	Signature
<p>If you want to run the setup on Oracle, you must create the database PLANNING with a user PLANNING (the name of the database and the user are case-sensitive) before launching the set up. Moreover, you must go on the folder [ORACLE] and add the user ASP.NET in the tab [Security].</p>
