

PlanningPME

Schedule easily

## General display of the schedule

(Function « tools » -> « options » -> « view »)

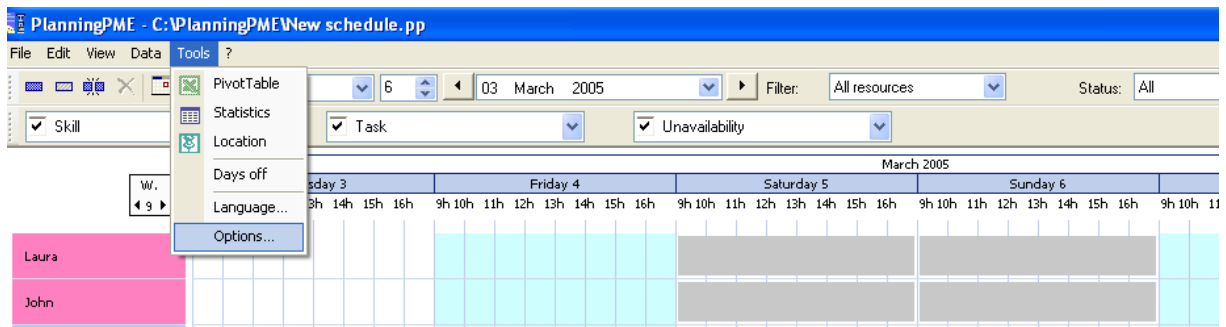

### I. Interest of this feature

It is possible to change the general display of your schedule playing with:

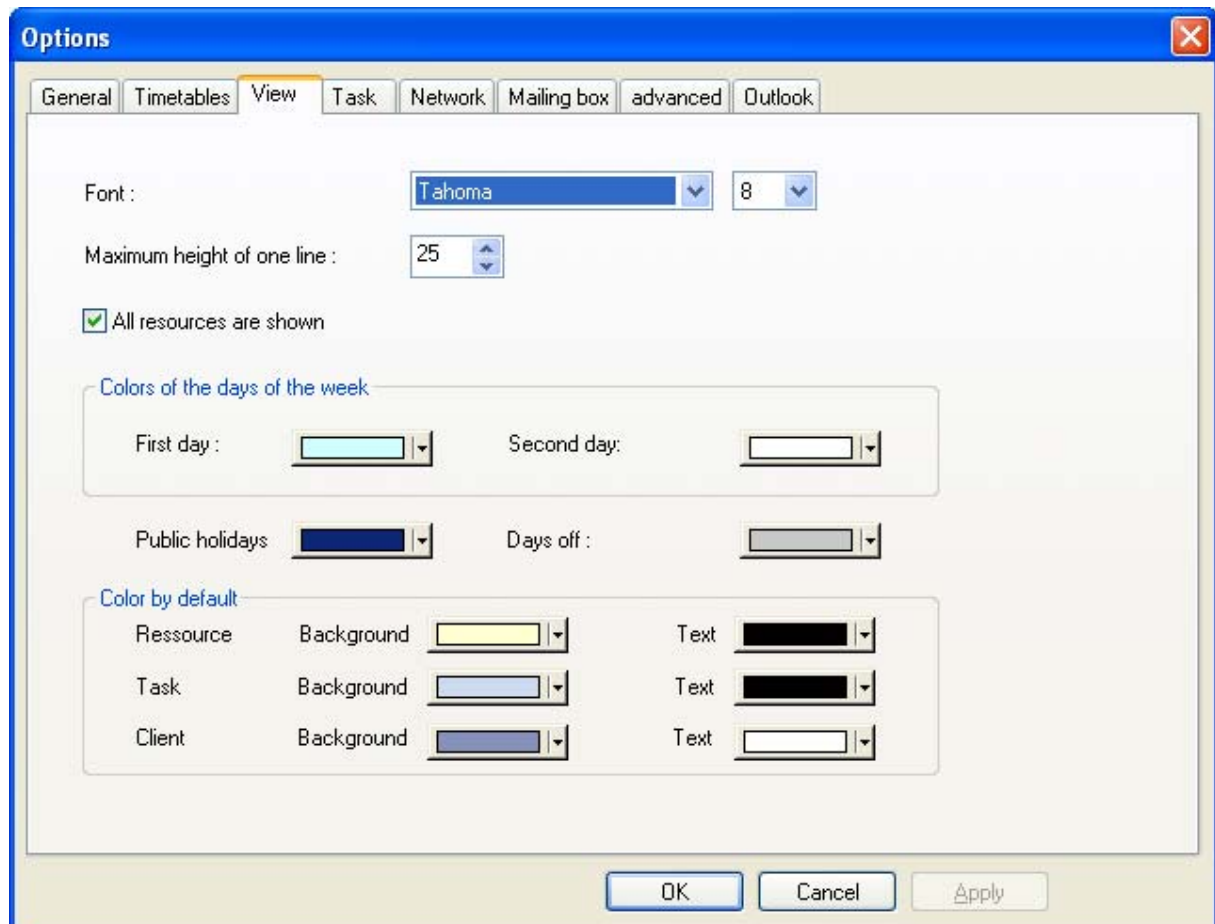

- The font: type and size
- The number of resources on your screen
- Colors of the days of the week
- The maximum height of a line
- Colors by default for tasks, clients and resources

### II. How to use this function?

Go to « Tools » -> « Options » -> « View »

The window below appears.

You can customize the schedule playing with different parameters. We are going to show you all the parameters thanks to the example below.

### III. Example

#### 1. The font: type and size

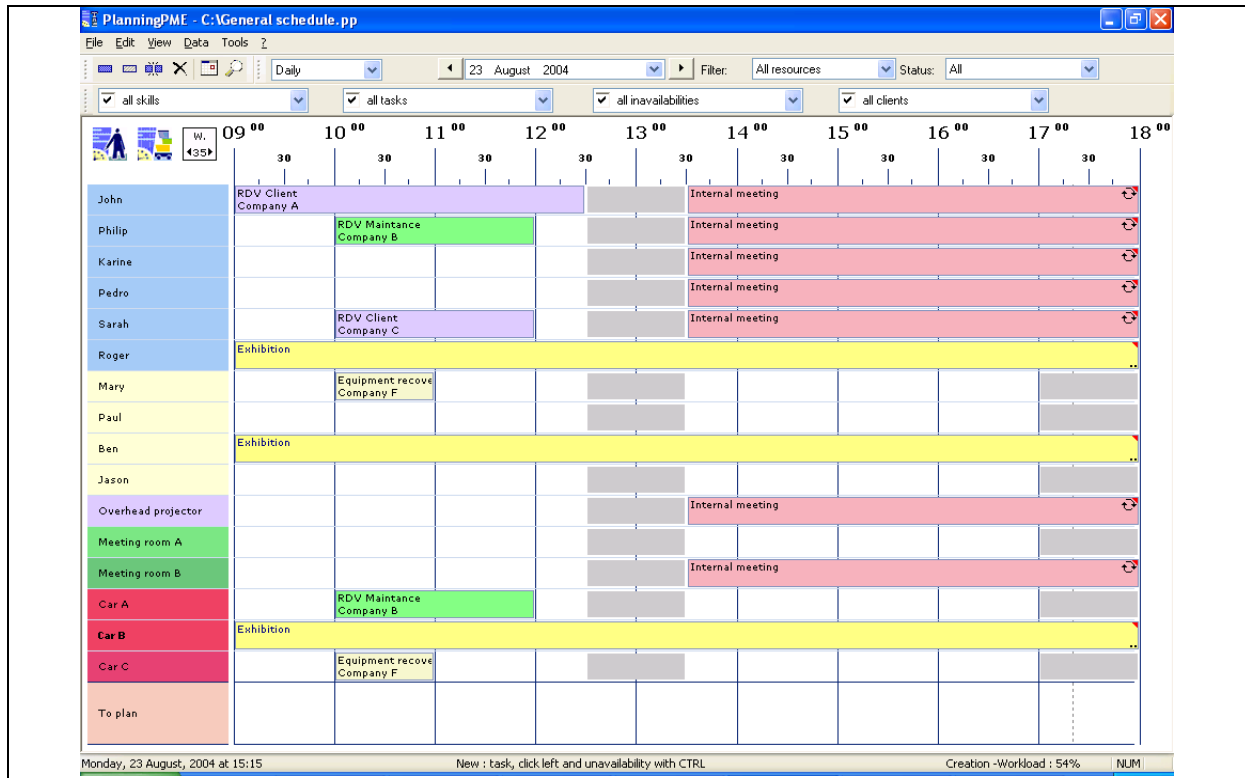

We chose two types and sizes of font to compare.

The screenshot shows the PlanningPME software interface. The title bar reads "PlanningPME - C:\General schedule. pp". The menu bar includes "File", "Edit", "View", "Data", and "Tools". The toolbar shows various icons and a "Daily" dropdown menu. The main area displays a Gantt chart for the date "23 August 2004". The chart shows three resources: John, Philip, and Karine. John has a task "RDV Client Company A" from 09:00 to 12:00. Philip has a task "RDV Maintenance Company B" from 10:00 to 12:00. All three resources have "Internal meeting" tasks from 14:00 to 16:00. The font size is set to 7 in the bottom right corner.

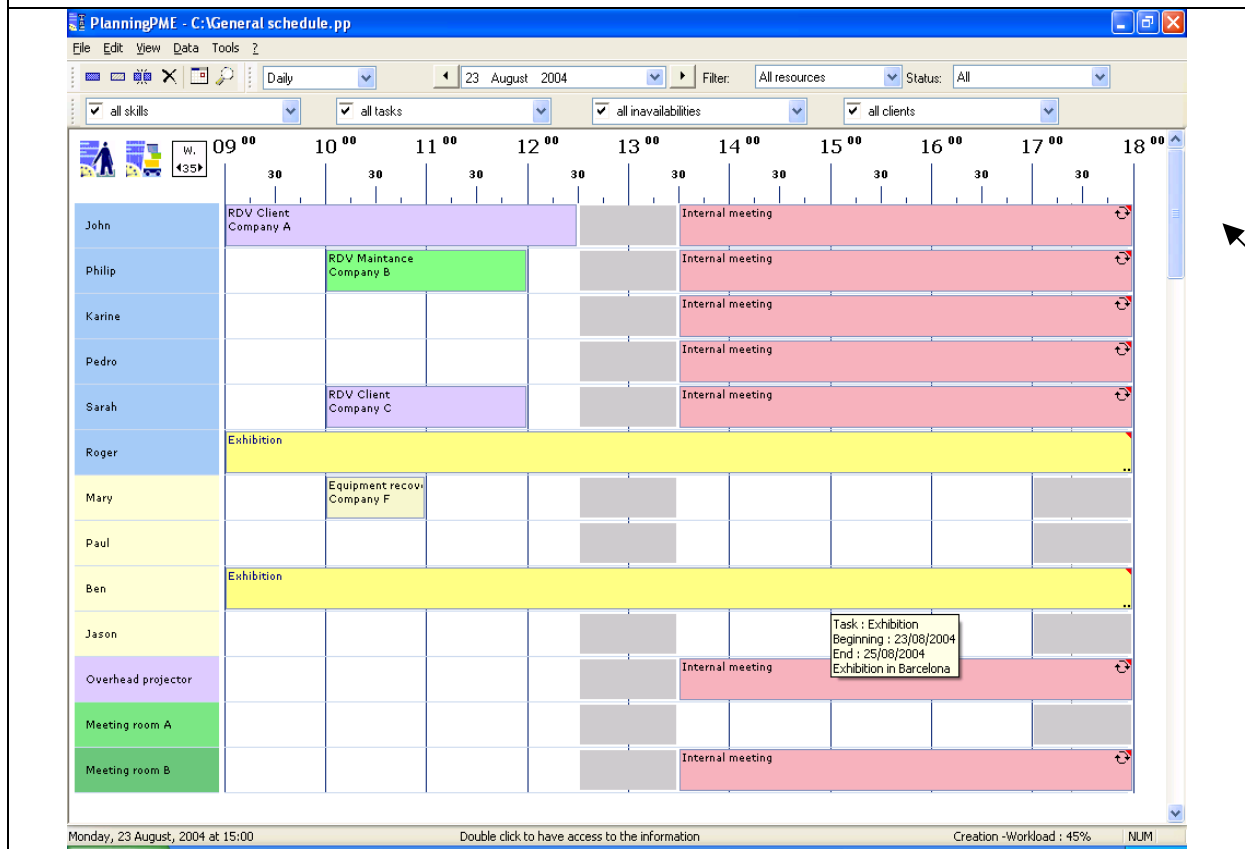

The screenshot shows the PlanningPME software interface, identical to the first one, but with the font size set to 10. The font type is "Tahoma". The Gantt chart and resource information are the same as in the first screenshot.

#### 2. Number of resources on your screen

You can choose to display all resources on your screen or to enter a number of resources displayed on your screen. In this second case, a scrolling bar will appear on the right side of the screen.

All resources are shown

Number of resources shown :

### 3. Colors of the days of the week

By default, the schedule is displayed with these colors :

The screenshot shows the PlanningPME interface. At the top, there's a menu bar (File, Edit, View, Data, Tools) and a toolbar. Below that, a navigation bar shows 'Weekly' view, a date selector for '13 September 2004', and filters for 'All resources' and 'Status: All'. There are also checkboxes for 'all skills', 'all tasks', 'all inavailabilities', and 'all clients'. The main area displays a weekly schedule for 'September 2004 Week 38'. The days of the week are M (13), T (14), W (15), T (16), F (17), S (18), and S (19). Resources listed are John, Philip, Karine, and Pedro. The schedule cells for Monday-Friday are light blue, and Saturday-Sunday are grey. Below the schedule is a control panel titled 'Colors of the days of the week' with four dropdown menus: 'First day' (light blue), 'Second day' (grey), 'Public holidays' (dark blue), and 'Days off' (grey).

You can change the colors. For example:

This screenshot is identical to the one above, but the 'Colors of the days of the week' control panel has been updated. The 'First day' dropdown is now pink, 'Second day' is light yellow, 'Public holidays' is red, and 'Days off' remains grey. The schedule grid below reflects these changes, with Monday-Friday cells now pink and Saturday-Sunday cells light yellow.

### 4. The maximum height of a line

You can raise the height of your lines for a better visibility.

The program will first take into account the number of resources you want to display on the screen and then, the maximum height of the line.

### 5. Colors by default for tasks, clients and resources

You can choose the colors by default for resources, clients and task from this window:

Color by default				
Ressource	Background	<input type="text" value="Yellow"/>	Text	<input type="text" value="Black"/>
Task	Background	<input type="text" value="Light Blue"/>	Text	<input type="text" value="Black"/>
Client	Background	<input type="text" value="Dark Blue"/>	Text	<input type="text" value="White"/>

### III. Contact PlanningPME

For any help or information about the software PlanningPME, the team of TARGET SKILLS is at your entire disposal.
